

PAST PERFORMANCE & EXPERIENCE

Our team consists of highly trained and certified professionals with deep expertise in various trades, ensuring quality workmanship and adherence to industry standards while also abiding by federal, state, and local code enforcement and regulatory requirements. Venus Supplies & Services, d.b.a. Total Facilities Solutions has a proven track record of successfully managing multi-team projects including the installation, maintenance, and upgrades to critical infrastructure systems.

Federal Prime Contract – NAVFAC Mid-Atlantic
Contract No.: N40085-25-D-2530 | Awarded: March 26, 2025
Scope: Third-Party Air Monitoring

Venus Supplies & Services, d.b.a. Total Facilities Solutions, is the federal prime contractor providing Third-Party Air Monitoring in support of NAVFAC construction and environmental compliance requirements.

Performance included 6 SROs conducted between July 21, 2025 and February 4, 2026.

Work included monitoring services at NSA-Philadelphia and The Philadelphia Navy Yard, with representative facilities including the Ballistics Lab, Building 56, Building 1 (3300 Wing), and the Carpenter Shop. Contract scope also included execution of an FSWTB3 base-wide survey of 53 buildings.

Venus Supplies & Services has a demonstrated history of supporting large-scale, multi-team projects in a non-federal contracting role, providing materials, services and maintenance. Our role on these projects was limited to commercial support functions and did not include acting as a federal prime contractor.
